

Screw Pumps

MPI stocks and supplies screw pumps, manufactured in Europe. These pumps are designed with certain improvements compared to well-known brands already existing on the market.

These pumps have external bearings which are the ideal solution when pump media has a low viscosity.

Additionally, the screws are of hardened carbon steel instead of the Cast iron screw, thus providing a longer life.

All these pumps are assembled with John Crane Mechanical seals and designed to work with fluids up to 1.2 CSt Viscosity.

MPI can offer replacements with conventional coupling or Magdrive for:

IMO : ACE/ACFACG/ACP/LPQ

ALFA LAVAL : ALP

KRAL : K/CG

Leistritz : L3NG

AZCUE : BT

TAIKO KIKAI : NHG/MST/MST-H/MSH/MSB/MSH-X/MSE-X/CSL

IRON : ON

NANIWA : ALG/SNH

SHIN SHIN : NLG/NHGH

MPI can also deliver complete Pump stations.
